- Touchscreen USB
- Roof mounted display
- Wireless headphones

(c) CarTFT.com

This display include wireless IR headphones for convenient, quiet use. The high native resolution of 800x480 delivers crystal clear images while the built-in scaler supports display resolution all the way up to 1024x768. Two audio/video inputs, along with the VGA, allow the monitor to be plugged into 2 audio/video devices, as well as a computer. Also, the 16:9 widescreen aspect ratio works beautifully with DVD movies.

Included with this monitor are the roof mount kit with monitor attached, a wireless headphone, and composite video/audio cables and VGA cables.
